DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-26 are allowed. The following is an examiner's statement of reasons for allowance:

The Examiner considered Patent Number US 6,230,150 B1 by Walker et al to be the prior art most closely related to the Applicant's claimed invention. The vending machine evaluation network disclosed by Walker incorporates a central server 300 that is in communication with a plurality of vending machines 400-408, it fails to disclose or suggest either the analysis of performance data of a plurality of currency acceptors that differ from other currency acceptors in a similar way (Applicant's independent claim 1),

Art Unit: 3653

or deriving re-configuration data of currency acceptors based upon a statistical analysis of a plurality of vending machines (Applicant's independent claim 24).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 5,029,098 by Levasseur because of its status monitoring means 116, and

Patent Number 4,631,357 by Grunig because of its central switching station 34.
